

Department for Planning, Nature and Environment

Urban planning deals with the development of the city as well as with the spatial and structural, traffic, landscape and social structures in the city. The topics of tree and nature conservation as well as climate protection are also part of the wide range of tasks of the Department for Planning, Nature and Environment in addition to urban planning aspects. The building advice service in the Department for Planning, Nature and the Environment is the first point of contact for those planning to build and for planners.

Functional Area: Planning

Contact for

- Building questions (with regard to planning law, design, cultural heritage preservation)
- Land development plan and land-use plan

- Town development concepts, town planning framework conditions and technical planning
- Town planning competitions, idea competitions, architectural competitions, etc.
- Town redevelopment plans and promotion of urban development
